## OBJECTIVE

Recent computer science graduate from Virginia Tech College of Engineering looking to attain a full-time job that allows me to use my passion for frontend web app or mobile app development.

## SKILLS

- **Languages:** React/React Native, Node, HTML, CSS, JavaScript, TypeScript, Java, C, Python
- **Platforms:** Docker, Kubernetes, Git, GraphQL
- **Databases:** MongoDB, MySQL, Postgres

## NOTABLE PROJECTS

- **[Availabowl](#):** crowd-sourced social network where college students review dining experiences.
- **[Smart Parking](#):** ML forecast algorithm to predict number of parking spaces available at the James Madison University campus parking garages stored as a Flask server endpoint
- **Threadpool:** work-stealing multithreaded thread pool management program coded in C

## RELEVANT EXPERIENCE

### **[Triblio \(IDG\)](#)**

**June 2018 - September 2018; May 2022 - August 2022**

*Software Development/Engineering Intern*

Reston, VA

- Expanded on email suite that relays QA test results to have an aesthetically pleasing template
- Maintained and wrote tests upon QA suite with Jest, Puppeteer, Selenium, Protractor, and Node

### **[Availabowl](#)**

**July 2020 -**

*Lead Programmer and Founder*

- Crowd-sourced social network where college students review dining experiences at American universities.

## ACTIVITIES & ORGANIZATIONS

**Phi Sigma Kappa, Virginia Tech Epsilon Hexaton Chapter**

**February 2021 - present**

*Men's Social Fraternity, Public Relations Chair (January 2022-January 2023)*

## EDUCATION

***B.S, Computer Science at Virginia Tech***

**August 2019 - present**

Blacksburg, VA

In-Major GPA: 3.17, Cumulative: 3.15

**Expected Graduation:** Spring 2023
